The weather continues hot and dry, for the The worshier continues hot and dfy, for the thinder showers that have fallen within the past the seek have done little more than moisten the surface. The city is free from sickness except that which helongs to all humanity, and, if not clean, our streets and alleys are from time to time sprinkled with disinfectants. It would certain sprinkled with disinfectants. It would certain sprinkled with disinfectants. time sprinkled with disinfectants. Where the responsibility for such fallure lies, or what the rentedy, might be profitably investigated, if there were any hope that in so husy a place, meu would make or find time to consider about it, and apply the propersemedy.

Yes, shough all this is patent-the more respectable classes look or work on, each in his proper sphere of business, and hope that things will mend; as if they could mend, when there are none to help the amending process. Now when I say, "the respectable classes," I by no means: refer to rich merchants or professional menuer. artists, or men of letters, and teachers and clergyman, but to all that large and most respectable portion of our citizens, who, as shookeepers, mechanique, and even day laborers, so habitually neglect any considerate exercise of the elective franchise, which ander our system, is the sole check, short of revelution, upon mismie or corruption. Districted—The breeze of Thur-day night, we are sorry to learn, caused considerable have upon a portion of the new barber at the "Breight Cur". That portion of the wor built in accordance with the plans, and under the super wiston of the U.S. Agest, remains undrely unaffected by the sea. It would have been well for the friend of the Chairman of that Committee (Ald Hadley) who in the Neces sought to make an invisions comparison between the works of the City and those of the Government, to have awalted this result, or at least until the work is con-pleted and gold for. concerning Uss. Fremon. The resewring is an extract from the pre face of the author.

"He has endsavored to lay before the reader every event in the 1th of Oel. Pressont and the substance of every bear, report or speech of a public character that he has written or made, having a tendency to enlighten the sountry in regard to bliq uniforations for the highest houses of the Republic. The author is not conscious of having suppressed anything that ought to have been revealed, or of having stated a single fact which he did not helphoet to be susceptible of proof. To except the supplication, however, to which a hierarchy of a Presidential candidate in necessarily exposed, he has unstorately given considered in the records, whether it was practicable that his readers may have as little treathe as possible in adjusting the measure of allerance to be in 1s for the part alliber of political or personal friends; i. A glance at the foil willing pages will satisfy the next covery observer that it is more subegy, but a faithful six of of the fixed presents of allerance in least with difference, and a second-village regard for trutt. He regrets that the brief time allowed for the greaters of negrossing professional desire, have received his making it less unworthy of its subject.
